# knowing numbers

A community approach to understanding the early childhood education workforce

### Regional Municipality of Peel

### **Regional Municipality of Peel**

The regional data presented here are part of the larger provincial early childhood education workforce study **Knowing Our Numbers** (KON). The Regional Municipality of Peel is one of 43 regional children's service districts that participated in the study representing over 91% of all regions in Ontario. Details on the project, methodology, and province-wide results can be found <u>here</u>. In the <u>Executive Report</u>, Peel is part of the 'Central West' data region. Census data provided on the following page allow readers to put the results into the context of regional demographics.

## Sample Characteristics

A total of 127 individuals working in early years services in the Regional Municipality of Peel responded to the survey (referred to as the 'workforce survey'). Of these, 82.7% are RECEs and 17.3% are non-RECEs (referred to as the 'workforce'). Most respondents are from non-profit programs (54%). As the number of respondents who are directors (n=9) and licensed home child care providers (n=9) in Peel is low, data are not presented here; these data are included in the **Executive Report**.

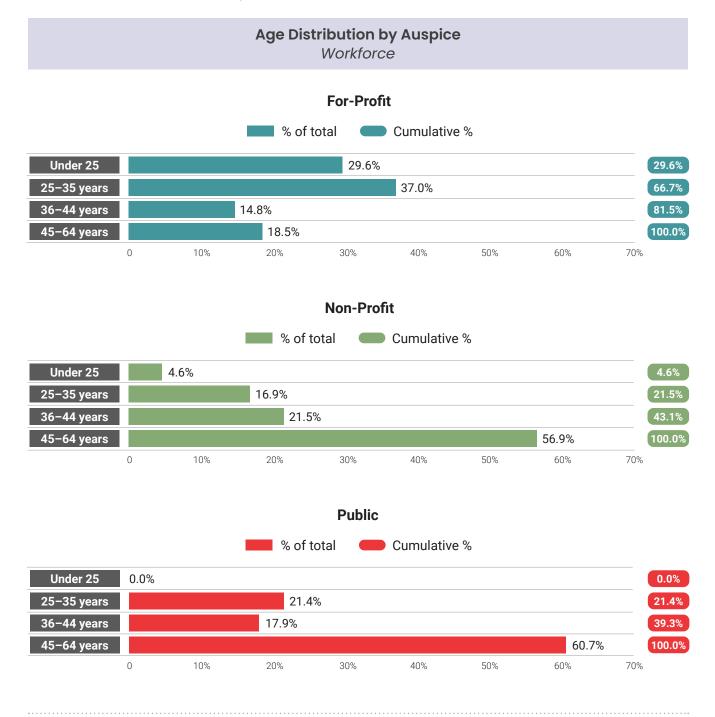

AGE

Approximately half (50.4%) of *workforce* respondents are under the age of 45.

Respondents working in for-profit organizations are much more likely to be younger. Approximately 82% of *workforce* participants from for-profit programs are under the age of 45 years. By comparison, about 43% in non-profit and 39% in public programs are under 45 years of age. Public data reflect responses from educators working in full-day Kindergarten.

KNOWING OUR NUMBERS: REGIONAL MUNICIPALITY OF PEEL

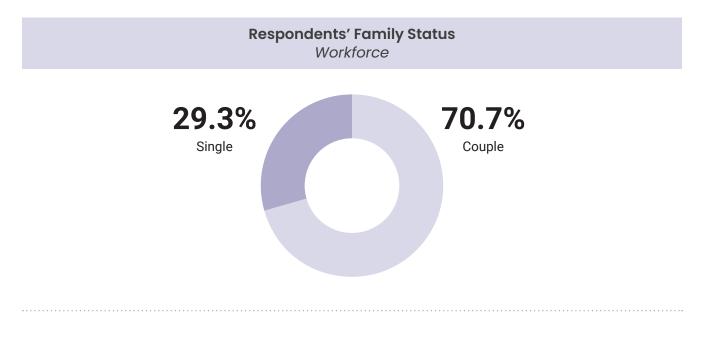

#### YEARS OF EXPERIENCE

Participants who work in for-profit programs have the fewest years of experience. In contrast, public programs tend to have more experienced educators.

Years of Experience by Auspice Workforce						
Auspice	Mean	Minimum	25th percentile	Median	75th percentile	Maximum
For-profit	7.5	0.0	1.5	5.0	14.0	24.0
Non-profit	14.5	0.0	7.0	11.0	23.5	36.0
Public	17.1	0.0	10.0	20.0	25.0	34.0

#### **FAMILY STATUS**

Approximately 29% of the *workforce* survey respondents are single.

#### RACIALIZATION

About half (50.5%) of the *workforce* sample identify as racialized.

## Compensation

#### WAGES

Overall, wages of RECEs are higher than for non-RECEs. Those working in for-profit programs have the lowest hourly wages. Approximately 18% of respondents report having additional employment to supplement their primary wages.

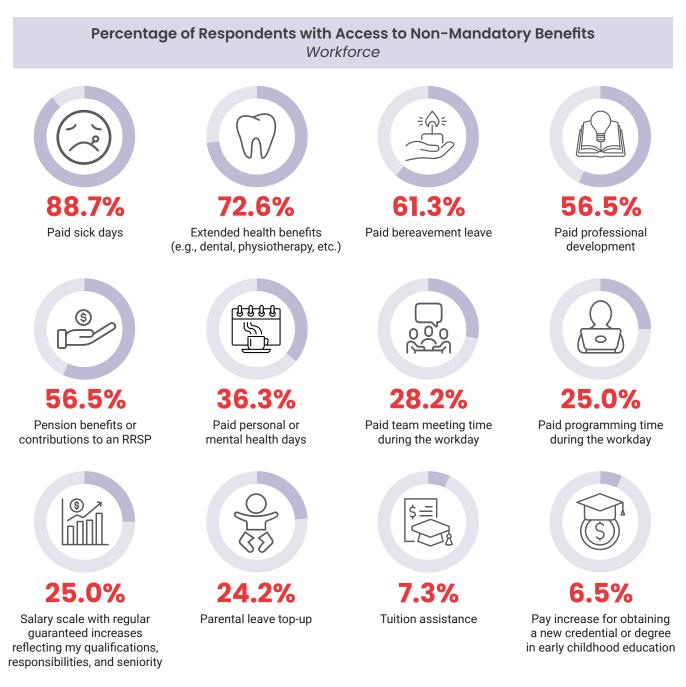

Hourly Wages by Auspice and RECE Status Workforce			
	RECE status		
Auspice	Non-RECE	RECE	
For-profit	\$22.14	\$21.95	
Non-profit	\$25.70 \$28.1		
Public	N/A	\$27.87	
Average across auspice	\$24.79	\$26.56	

The median director/supervisor hourly wage in the overall provincial findings is \$30 per hour, with a minimum of \$18 per hour and a maximum of \$80 per hour. Regional-level data for Peel are not available due to low participant numbers. More information on directors/supervisors can be found in the **Executive Report**.

#### **BENEFITS**

Almost 89% of *workforce* respondents in Peel report having access to paid sick days. Over half (56.5%) report having pensions or RRSP contributions through their employer and paid professional learning opportunities (56.5%). Pay increases for obtaining a new credential or degree in early education (6.5%) and tuition assistance (7.3%) are rare.

## Workforce Stability, Stress, and Job Satisfaction

#### DISCRIMINATION

Approximately 54% of workforce respondents report having experienced workplace discrimination. The types of discrimination experienced vary, with education/seniority (50.7%) being the most common, followed by racism (40.9%) and bullying (39.1%). Note that bullying may involve, or be rooted in, other forms of discrimination (e.g., racism or ageism).

Percentage of Respondents Reporting Experiences of Workplace Discrimination Workforce

Experiencing discrimination: **54.3%** Not experiencing discrimination: **45.7%** 

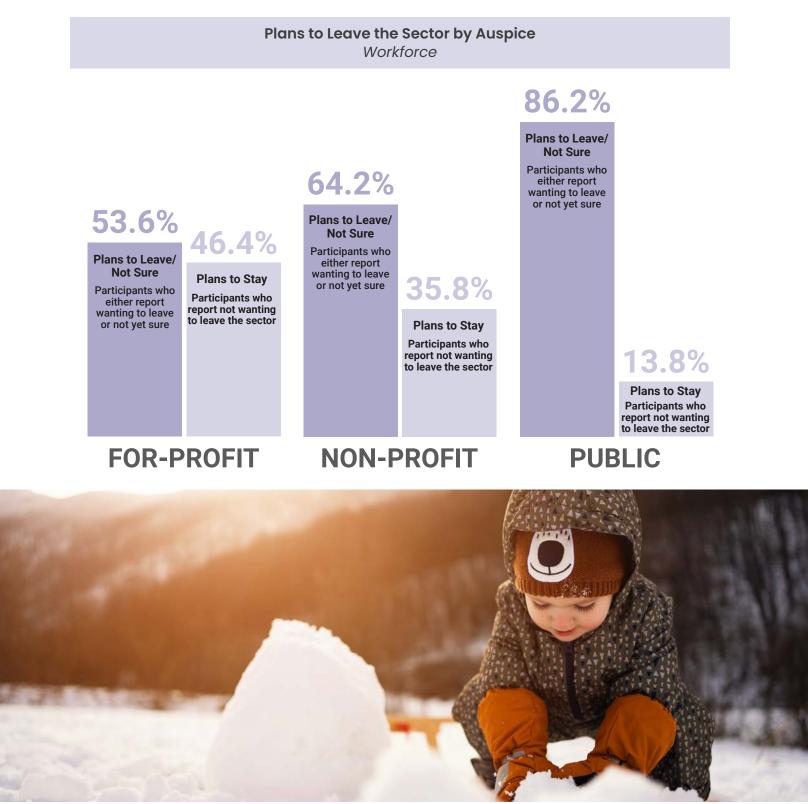

#### **Types of Discrimination** Workforce

Education/seniority	50.7%
Racism	40.9%
Bullying	39.1%
Ageism	26.1%
Mental health	21.7%
Body prejudice	18.8%
Immigration status	14.5%
Religious belief	11.6%
Sexism	5.8%
Ableism	4.4%
Homophobia	4.4%

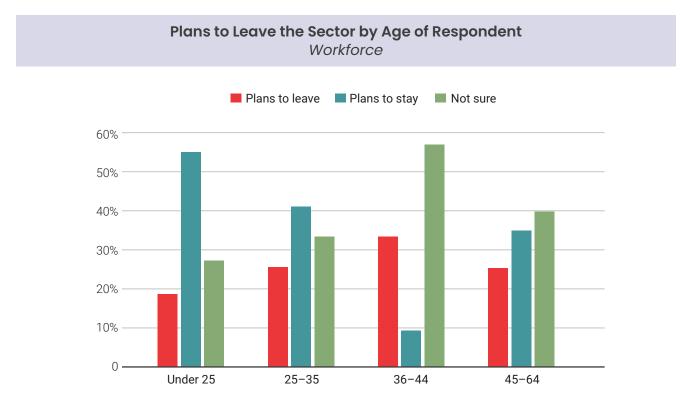

#### **JOB SATISFACTION**

Across all auspices, only 32.8% of respondents from Peel report plans to stay in the sector over the next five years (data not shown). Those who work in for-profit programs are the least likely to report plans to leave the sector or say they are unsure (53.6% versus 64.2% for non-profit and 86.2% for public). Only 13.8% of respondents from public programs report plans to stay.

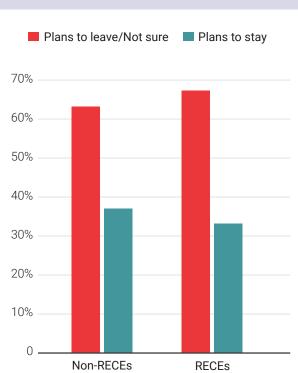

Those between the ages of 36 and 44 are much more likely to report plans to leave the sector (33.3%) or say they are unsure (57.1%). Only 9.5% in this age group plan to stay. This is of concern, as this age group is more likely to have the most experience in the early years sector. Note that those 65+ are not included in these findings as plans for retirement would confound results.

KNOWING OUR NUMBERS: REGIONAL MUNICIPALITY OF PEEL

Overall, only 32.4% of RECE respondents report plans to stay in the sector, with 67.7% either planning to leave or being unsure. Non-RECE findings are similar to those of RECEs.

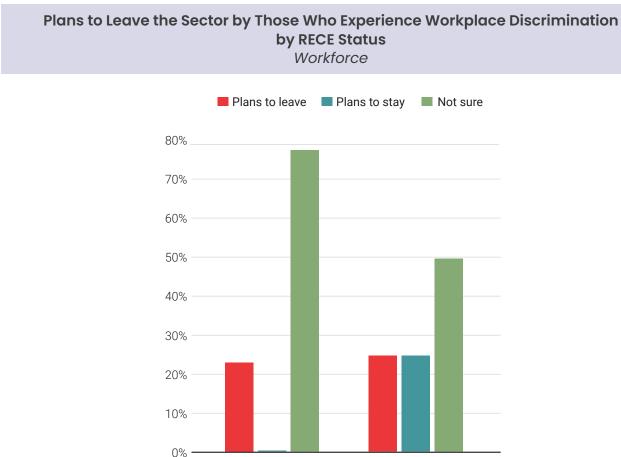

Plans to Leave the Sector by RECE Status Workforce

Provincial results show that only 32.5% of directors/ supervisors plan to stay in the sector in the next five years.

Plans to leave the sector are associated with experiences of workplace discrimination. Those who experience discrimination are more likely to report plans to leave in the next five years or are uncertain. Of these, non-RECEs are more likely to report uncertainty about their plans compared to RECEs. This has implications for professional learning and human resource management. More detailed discussion can be found in the **Executive Report**.

Non-RECEs

RECEs

#### WORKPLACE STRESS

Those working in for-profit and public programs report the highest levels of stress on a scale of 1 (low stress) to 5 (high stress). In addition, RECEs report higher stress levels (3.6) than non-RECEs (3.0).

#### Average Level of Stress by Auspice Workforce (1=low stress; 5=high stress) **RECE status** Non-RECE RECE Auspice Average across RECE status For-profit 3.3 3.6 3.6 2.8 3.5 3.3 Non-profit Public 3.3 3.8 3.7 3.0 3.6 3.5 Average across auspice

Note: All averages are weighted.

Respondents from Peel generally report a low level of job satisfaction. On a scale of 1 (low job satisfaction) to 5 (high job satisfaction), respondents level of satisfaction is 2.5 out of 5.

#### Average Level of Job Satisfaction by Auspice and RECE Status Workforce

(1=low job satisfaction; 5=high job satisfaction)

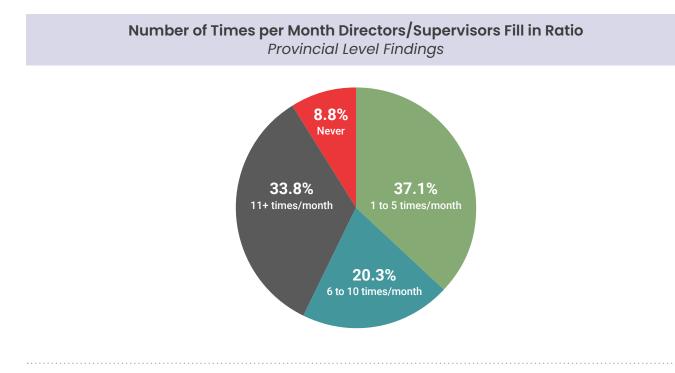

#### **RECE status**

Auspice	Non-RECE	RECE	Average across RECE status
For-profit	2.5	2.2	2.3
Non-profit	2.7	2.6	2.7
Public	3.3	2.5	2.5
Average across auspice	2.7	2.5	2.5

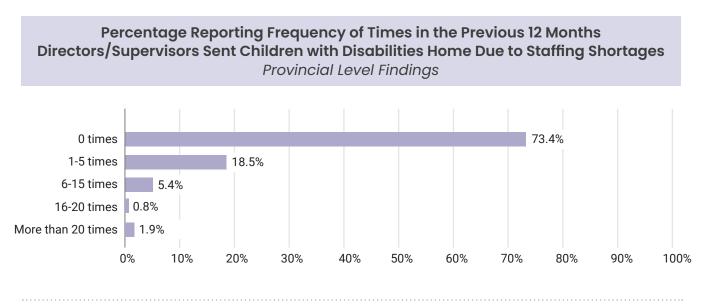

Note: All averages are weighted.

#### WORKPLACE STABILITY

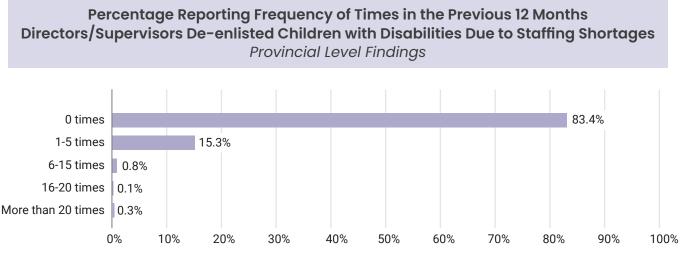

Directors often stand in for absent staff by necessity, taking them away from their leadership and administrative duties. Provincial level findings show that just over one-third (33.8%) of management staff report having to fill in more than 11 times per month to maintain ratios. Regional-level data for Peel are not available due to low participant numbers.

Staff shortages also have deleterious effects on the inclusion of children with disabilities or varying needs. Almost 27% of director/supervisor province-wide respondents report they have had to send a child(ren) with a disability home due to staffing shortages. Regional level data for Peel are not available due to low participant numbers.

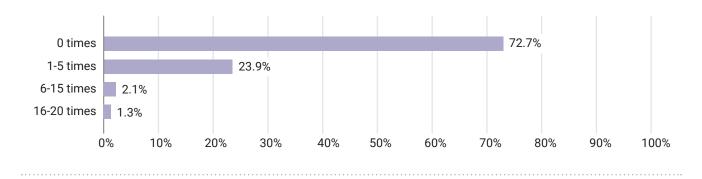

Almost 17% of director/supervisor respondents across the province report they have de-enlisted at least one child with a disability from their program in the previous 12 months due to staffing shortages. Furthermore, 27.3% report they have refused admission to a child with a disability in the previous 12 months due to workforce shortages. Regional level data for Peel are not available due to low participant numbers.

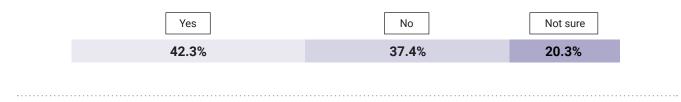

Note: Total does not add up to 100% due to rounding.

Percentage Reporting Frequency of Times in the Previous 12 Months Directors/Supervisors Denied Admission to Children with Disabilities Due to Staffing Shortages

Less than half (42.3%) of *workforce* respondents in Peel report they would recommend a career in the early years to others who are interested.

Similarly, less than half of Peel *workforce* respondents (42.3%) state they would recommend their program to a family member or friend looking for child care. RECEs (39.6%) are less likely than non-RECEs (54.6%) to report they would recommend their program. This is lower than reported in other regions and is of concern, as RECEs have better knowledge and training to judge program quality.

	RECE s	tatus	
	Non-RECE	RECE	Average across RECE status
Yes	54.6%	39.6%	42.3%
No	13.6%	42.6%	37.4%
Not sure	31.8%	17.8%	20.3%

### Percentage of *Workforce* Respondents Who Recommend Their Early Years Program to a Family Member or Friend

## Professional Development

#### FORMS OF PROFESSIONAL LEARNING

Peel respondents report that the most common form of professional learning in the previous 12 months was online delivery (80.3%), followed by self-study (58.3%) and performance reviews (54.3%). Only 22.8% of respondents report having attended a conference or taken a course in the previous 12 months.

Although online delivery is the most common form of professional learning received in the previous 12 months, respondents report it is among the least desired format (25.2%), third after self-study (15.8%) and performance reviews (20.5%). Respondents prefer structured mentoring (37.0%), small group coaching conversations (37.0%), ongoing communities of practice (32.3%), workshops (32.3%), and attending conferences (36.2%), all of which are forms of collective learning.

#### CONTENT OF PROFESSIONAL LEARNING

Over half of respondents report receiving training in anti-bias/anti-racism (55.9%), cultural diversity (53.5%), and supporting children with disabilities (52.8%) in the previous 12 months. In contrast, participants report the least amount of professional learning in the areas of incorporating Afrocentric ways of being (19.7%) and land-based learning (22.8%). Census data for the region help contextualize results.

The most wanted professional learning reported is centred around supporting vulnerable (50.4%) and newcomer families (44.9%), incorporating land-based learning (40.9%), supporting children with disabilities (43.3%), and critical trauma-informed practice (41.7%). Around one-third of participants also report wanting more professional learning centred around incorporating Afrocentric ways of being (35.4%), Indigenous ways of knowing and being/decolonization (33.1%), and supporting 2LSGBTQIA+ families (37.8%).
